Examiner's Amendment/Comment

The drawing sheet containing Figure 7 was received on 2 May 2005. This drawings sheet is acceptable.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claims 1, 13, 25 and 30, "slided" was changed to -- slid -- (see The American Heritage® Dictionary entry for "slid").

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: while Zook et al. (5,844,920) does show two byte synch fields (116 and 124 in Figures 4A-4E for example) with a random data field (118) interposed between them, Zook et al. (as well as all the other cited references) fails to teach or suggest a bit-synch field (as in applicants' claim 26) or a synch field for synchronizing the read channel (as in applicants' claim 29) in combination with said byte synch fields. None of the cited references teach or suggest a synchronization symbol which optimizes Hamming distance when slid over a concatenation of itself with random data (as in applicants' claims 1-25 and 30-37).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
